

Densidad energética del plancton en el Canal Beagle y primeros resultados en el AMP Yaganes

DO Bruno, C Chaparro Godoy, N Alvarez, FL Capitano, CC Boy*

* ccboy@conicet.gov.ar | @lefyecadic

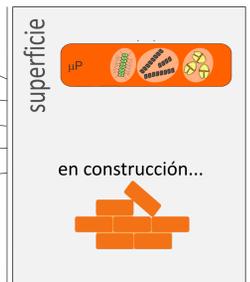

Fracciones del plancton:

- μP microplancton (0,7 - 67 μm)
- μZP microzooplancton (67 - 200 μm)
- mZP mesozoplancton (> 200 μm)
- IctP ictioplancton (larvas de peces)

AMP área marina protegida

sentido de circulación de la energía

densidad energética (DE) 5 8 10 12 22 kJ/g
